

International Phytotechnology Society

**Providence
RI, USA**
October 26-28, 2026

CAES

The Connecticut Agricultural Experiment Station

Putting Science to Work for Society

150th ANNIVERSARY
1875 – 2025

*Join us for the 19th International Phytotechnologies Conference **Growing Clean: Partnering with Plants to Remediate, Recover, Renew.** The conference will serve scientists, consultants, designers, engineers, builders, regulators and site owners, coming together to explore how phytotechnologies can address current and emerging environmental challenges.*

Providence, Rhode Island: one of New England's most creative and culturally rich cities

Keynote speaker: Prof Marshall Porterfield,
Purdue University: Plant biology, biosensors & space!

Conference topics include:

- Phytoremediation of organics
- Complex/emerging pollutants
- Phytoremediation of inorganics
- Phyto-hydraulics
- Wetlands
- Long-term case studies
- Monitoring and assessment
- Bioaugmentation
- Plant nanotechnology interactions
- Aligning green stormwater infrastructure
- Climate resilience
- Applications for farms and food production
- Eco-systems and agricultural optimization
- Applications for trees and urban forestry
- Recovery and restoration of brownfields
- Municipal and coastal resilience
